

# WOW! what green is that?

Nature-inspired colors are trending! Check out these awesome shades.

## buckingham gardens

BY BENJAMIN MOORE

"A vivid color gives this entry its own voice, making it more than just a pass-through area. This is a true grass shade that helps bring the outside in, especially when you see the tree in the window!"

## offbeat green

BY SHERWIN-WILLIAMS

"Here's a green that captures attention. It brings vibrancy to these shelves, and I like how it can look more chartreuse or more lime depending on the time of day."

—Amy Hadley,

## funky frog

BY PPG PAINTS

"I fell in love with the luscious color of these glass tiles and then found this paint to match. I used it on the walls, door, and ceiling so you'd feel like you're in a garden surrounded by

plants, perfect for a bathroom."

## fig tree

BY BEHR

"I call this green a bold neutral because, like most shades found in nature, it has presence but doesn't overpower a room. The warm undertones make our dining room feel cozy and inviting."
